and Environmental Systems

Information on the course Hydrogeological Investigations / Field Course Hydrogeology during the summer semester 2022

We are delighted to offer the "field course hydrogeology" again in the summer term 2022!

There will be an **online/webex info-session¹** on **11. April 2022 at 10am**. On that occasion, we will explain some background information and the proceedings of the course, including the field component that takes place in Horkheim (near Heilbronn). Looking forward to meeting you there!

The first lecture will take place on **Wednesday, 20 April 2022 from 8:00-9:30** in room **PWR 61 - 1.002**. Lectures will take place Wednesdays 8:00-9:30 and Fridays 8:00-11:15.

Further lecture dates can be found in the C@MPUS under the course "Field Course Hydrogeology". The contents/topics are also stored in the C@MPUS under the module "Hydrogeological Investigations".

The number of participants is limited to 24.

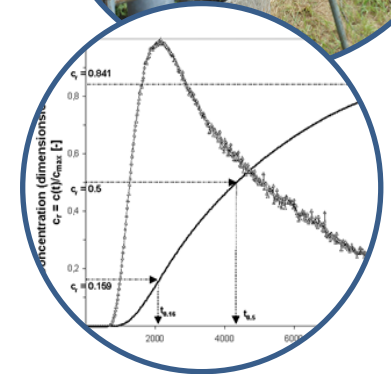

The participation in the field course weekend (25./26. Juni 2022) as well as in the final colloquium on 22.07.2022 is mandatory and a prerequisite for admission to the exam!

If places are available, it is also possible to participate only in the field course weekend itself

Students who would like to participate in this course are requested to contact Dr. Claus Haslauer in advance.
